SUMMARY

Frontend Software Engineer with experience building production web applications using React, TypeScript, and modern frontend architecture patterns. Skilled in developing scalable user interfaces, integrating APIs, and building maintainable component-driven systems. Experienced delivering user-facing features across fintech and education platforms in Agile development environments.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

State & Data: TanStack Query, REST APIs

UI Systems: Chakra UI, Ant Design, Component-driven design

Testing: Jest (Unit & Integration Testing)

Tools & Workflow: Git, GitHub, Agile Development, Feature Flags

EXPERIENCE

Software Engineer — Bella AI (Remote)

January 2026 – Present

- Built React and TypeScript interfaces for student onboarding, enrollment, and learning dashboards.
- Integrated REST APIs using TanStack Query to support course enrollment, student progress tracking, and dashboard functionality.
- Developed reusable UI components and page structures to improve maintainability across the platform.
- Improved frontend performance through optimized rendering and API usage.
- Wrote unit tests with Jest and collaborated within Agile development teams.

Software Engineer — Seadans Solutions (Remote)

May 2025 – December 2025

- Built and maintained web-based onboarding flows for a fintech platform, enabling user registration and account setup processes.
- Designed and implemented scalable onboarding interfaces using React, TypeScript, and Tailwind CSS.
- Implemented feature flags and reusable UI components to support safe feature rollouts and maintainable frontend architecture.
- Integrated onboarding APIs using TanStack Query to manage data fetching, form submissions, and onboarding state.
- Collaborated in Agile development workflows using Git, code reviews, and testing practices.

Frontend Developer Intern — Seadans Solutions

November 2023 – April 2024

- Contributed to the development of Terrachain, a rental platform designed to simplify housing access.
- Built responsive UI components and integrated real-time and lease features.
- Followed best practices using ESLint, Prettier, and Git workflows.

Personal Project: WhatsApp-Integrated Booking Platform (Next.js, TypeScript, Supabase)

Built a scheduling system with availability management, booking logic, and authentication flows.

EDUCATION

BSc Computer Science — Nnamdi Azikiwe University (2019–2023)

GPA: 4.0

Relevant: DSA, Databases, Operating Systems, Networks, Machine Learning
